

# The 126th Itasca County Fair

## August 15-19, 2018

The Itasca County Fair Directors invite you to the 126th Itasca County Fair. We hope that you visit the fair this year and bring your friends to what promises to be another great fair.

There are many reasons to have a fair, from the great foods to the carnival rides and games, from the grandstand shows to the special entertainment. However, the directors still feel the biggest reason is the opportunity for you to exhibit in the over 2,000 classes listed in this book. You can be part of the expected \$20,000 to be given away in premium money along with the ribbons.

All Exhibitors must use on-line entry available by July 15th. Go to [www.itascacountyfair.org](http://www.itascacountyfair.org); go to fair entry tab and then click on the online registration link, be sure to "SUBMIT" entries from the viewing screen. You may also download and preview the Premium Book Rules and Regulations on that web page. **We require advance entry for all exhibits.** Advance entry allows us to have the exhibit tags and forms ready for you when you get to the fair. **Please pay close attention to the entry times for each division.** To enter in the 4-H department, you must contact the 4-H office.

The Itasca County Fair continues to be a gathering place for county residents to visit and have fun. With your help and support we will continue this fine tradition.

As always, we welcome your suggestions and concerns regarding your fairgrounds and your county fair. Stop by and visit with the directors during the fair, call one of us, or drop us a note to 1336 NE 3rd Ave., Grand Rapids, MN 55744.

**SNAP BEANS:** Harvest before constrictions appear between seeds, when seeds are about half grown. Ends of pods should not be broken off in picking. Pods should be uniform. Pods may be wiped clean, but not washed. Leave stems attached.

**BEETS, CARROTS, PARSNIPS, TURNIPS, RUTABAGAS:** Root crops should be mature but not over grown, pithy or coarse in texture. Tops trimmed off 1-1/2 inches above crown. Side roots trimmed off but not the tap root. Roots carefully washed but not scrubbed. Do not clean by brushing as done in the past.

**BROCCOLI:** Heads should be dark or purplish green and compact. Avoid yellow flowers in head. Stems cut about 5 inches from top of head.

**CABBAGE:** Stems cut about 1/2 inch below the head. Remove blemished or broken leaves but care should be taken not to peel the heads too much. A few outside wrapper leaves are desirable. Specimens may be washed.

**CAULIFLOWER:** Heads should be white, compact, and free of small leaves and ricy texture. Stems cut so as to leave 4 to 6 leaves. Outer leaves trimmed to 1- 2 inches above the white head. Use soft bristled brush to remove dirt from heads.

**CELERY:** Remove roots of stalk and trim but to form a triangle or pyramid. Trim diseased and broken leaves on outside until color is uniform.

**SWEET CORN:** Select ears that are well filled out to the tip. Kernels should be milky and juicy. Remove outer husks but allow a short shank and the inner husks to remain.

**CUCUMBERS:** Pickling: select fruits 3-5 inches long. Specimens should be the same stage of maturity and uniform in size, shape and color. Slicers: select fruits that are straight, dark green, and 6-10 inches long. They should be uniform in size, shape and color. Leave stems attached.

**KOHLRABI:** Remove roots just below the ball. Remove all but the upper 4-6 leaves. Select specimens that are uniform, medium size, and not hard or woody. Skin should be easily punctured by thumbnail. They should be cleaned, but not washed.

**STORAGE ONIONS:** Have specimens mature and thoroughly cured. The neck should be small. Do not peel to give slick appearance. Only such outer scales that are broken or discolored should be removed. Small basal roots should be left intact but trimmed to a uniform length of 1/2 inch. Wipe or brush but do not wash. Cut tops 1 inch to 1-1/2 inches long.

**BUNCHING ONIONS:** Specimens should be peeled, 6-8 inches, tops trimmed, roots trimmed to 1/4 inch.

**POTATOES:** Tubers should be uniform in size, color and shape. Washing is permitted but do not blemish the skin by scrubbing. Avoid specimens with defects or disease.

**RHUBARB:** Select specimens that are straight, uniform and unblemished. Stalks should be pulled from the plant, not cut. Trim the leaf blade to about one inch above the stalk.

**SUMMER SQUASH:** Select small to medium size fruits when the rind is soft and easily punctured with thumbnail. Select specimens that are uniform in size, shape, and color. Leave about 1/2 inch of stem and wipe fruits clean.

**WINTER SQUASH and PUMPKINS:** Select mature specimens where the rind resists the pressure of the thumbnail. Fruits should be free of defects, uniform in size, shape, and color. Leave stem attached to the fruits.

**SWISS CHARD:** Select plants that are fresh, crisp and have bright green leaves. Trim off roots and trim butts to a pyramid shape. Trim off diseased and broken leaves on the outside until the color is uniform.
